BSG-03 Plus Grease

DESCRIPTION:

ABPL GREASE BSG 3 lus greases are premium quality, lithium soap, and multipurpose greases. The greases are manufactured from high viscosity index base oils and select additives with superior performance benefits. These greases exhibit superior mechanical & shear stability compared to normal NLGI Grade 3 greases.

APPLICATION:

These greases are specially developed for the lubrication of antifriction bearings of axle boxes of railway locomotives and electric motors to give longer service life.

Technical Details:

Appearance	Golden Yellowish
Soap	Lithium
Drop Point, °C, Min.	194°C
Free Organic Acidity, as OLEIC acid, % wt. Max.	0.20%
Free Alkalinity, as LIOH % wt, Max.	0.20%
Base Oil Viscosity @40°C cst Min.	150-160
Worked Penetration at 25°C after 60 Strokes,0.1 mm units	232-238
Viscosity Index Of Base Oil Min.	88
Four Ball Weld Load, kg	235-250 kg

PERFORMANCE BENEFITS:

- Excellence resistance to water washout.
- Superior oxidation and structural stability.
- High degree of antirust and anticorrosion.
- Give outstanding performance under varying.
